3 simple steps to get things running with PASS

Buy
Select and purchase your PASS package via your monthly Singtel bill or credit card.

Set Up
Submit your business requirements and our professionals will work on it.

Use
Once your solution is up and running, you can make changes through the online portal at myBusiness.singtel.com anytime.

Frequently Asked Questions

How does PASS work?
PASS is the professional assisted SaaS solution, which consists of setting up the solution, subscribing and providing unlimited helpdesk support for the next 12 months. All these for one flat fee for the first year. From the second year onwards, you will continue to pay at the prevailing monthly recurring charge of the service.

Can I terminate the service anytime?
The PASS package consists of the setup fee, including one year usage of the app. Therefore, we recommend that you continue to use it until the end of first year before you terminate. If however, you need to do so urgently, you may choose to terminate the service with 30 days notice, no refund will be provided.

What happens if I want to make changes after the setup is done?
Unlike other service providers who require a maintenance contract after the setup, you can login to your account and make changes and updates as and when necessary. You have control over your data. If you need assistance in making the changes, you can always contact our local helpdesk, 6 days a week.

*Applicable for purchase of cloud computing standalone plans.
